31801261	NET 10	Service Trap/s Exterior Bait Boxes	1.00

**GENERAL COMMENTS / INSTRUCTIONS**

Serviced all trap stations around the exterior perimeter of the building. There was 1 capture at the time of service, a mouse in one of the stations at the rear of the building. I removed the capture and added fresh bait to each trap. I recommend that the trees be trimmed back in order to avoid future issues with rodents accessing the interior of the building through the roof.

Rodent activity observed again by employees and myself. Droppings found in beverage storage area and under oven shelving on far right by window. One capture here as well, although it was already torn apart and eaten. Picked up droppings in these areas. Doors in back still have NO SCREENS installed and/or are broken. I have warned in my reports multiple times that these screens need to be fixed and installed if the doors are going to be left open, especially with the activity we are seeing out on the patio. Traps on either sides of these doors were also set off. Reset and rebaited traps. Further planning and action to be discussed

**GENERAL COMMENTS / INSTRUCTIONS**

Service Traps Within Stations in Landscape  
Serviced all trap stations around the exterior perimeter of the civic center. There were no captures at the time of service but I added fresh bait to each trap and cleared the runways of any debris. I also replaced detex blox where necessary, due to slug activity, not rodent activity.  
My recommendations are as usual, to clean up the trash located around the building, to do something about the trash cans, to trim down the grass and to cut the trees back from the building to make it less accessible for rodents to get onto the roof. Although, the construction beams give them access and do not help the situation.

Service Traps Within Stations in Landscape  
 Serviced all trap stations around the exterior perimeter of the civic center. There were no captures at the time of service but I added fresh bait to each trap. I removed and added fresh detex blox in a few stations due to mold. Same recommendations as last time. My only additional recommendation would be to cut back the tree that is close to the cafeteria patio area, easy access for rodents.

Service Traps Within Stations in Landscape  
 Serviced all trap stations around the exterior perimeter of the civic center. There were no captures at the time of service but I added fresh bait to wherever necessary. I also added several fresh detex blox. Recommend that a tree right at the corner of the cafeteria patio be cut down. It is hanging down by where the 3 stations are by the waterfall and it a certain way for rodents to gain access to the patio.

**GENERAL COMMENTS / INSTRUCTIONS**

Serviced all trap stations, except 1, around the exterior perimeter of the parking lots. There was 1 capture at the time of service, 1 rat in one of the stations in the employee carpool lot. I removed the capture and added fresh bait to each station except for 1 in the carpool lot, it's hidden under the overgrown ivy and I honestly could not find it. Same conditions, same recommendations.

**GENERAL COMMENTS / INSTRUCTIONS**

SERVICED ALL TRAPS WITHIN EACH STATION.

Serviced all trap stations around the exterior perimeter of the hall, cleaned them out and corrected several issues with them. There's a few that still need some correction though, the ones by the arched bench/ retaining wall area. These boxes are almost fully covered by the landscape, they are deep in the dirt. There was 1 capture at the time of service, a rat in the ivy by the theater. My recommendations are as follows: trim down the ivy, clear the landscape around the retaining walls and pick up trash around building.

CONDITIONS / OBSERVATIONS	Reported	Severity	Responsibility	Reviewed
<b>Open</b>				
Device 05 West Entrance (T-REX) <b>Condition:</b> ivy overgrown creating harborage for rodents <b>Action:</b> cut ivy to no less than 8" tall <b>Comment:</b>	12/15/2010	Low	TBD	12/20/2011
